Supported methods: None.N/AStores information about all the permissions a user is associated with in Orchestrator. Defines the processing state of a given queue item. The authentication system for the UiPath Orchestrator API uses a bearer token. An example error response in JSON format is as below: Sample Error Response { "error": { "code": "", "message": "No HTTP resource was found that matches the request URI ' .", "innererror": { "message": "No routing convention was found to select an action for the OData path with template '~/entityset'.", "type": "", "stacktrace": "" } } } Used to store various predefined application configurations like time zone or account e-mail information. { "Name": "", "Description": "", "MaxNumberOfRetries": 0, "AcceptAutomaticallyRetry": false, "ArchiveItems": false, "CreationTime": "2017-02-21T11:49:11Z", "Id": "" }GET eq 2 Response { "@odata.context": " metadata#QueueDefinitions", "@odata.count": 2, "value": [{ "Name": "AlexVQueue", "Description": null, "MaxNumberOfRetries": 2, "AcceptAutomaticallyRetry": true, "ArchiveItems": true, "CreationTime": "2016-10-27T15:47:02.43Z", "Id": 2 } , { "Name": "myFirstQueue", "Description": null, "MaxNumberOfRetries": 2, "AcceptAutomaticallyRetry": true, "ArchiveItems": true, "CreationTime": "2017-01-16T11:49:47.79Z", "Id": 32 }] } POST Request { "Name": "APItestQueue", "Description": null, "MaxNumberOfRetries": 5, "AcceptAutomaticallyRetry": true, "ArchiveItems": true } PUT 32) Request { "Name": "myFirstQueue_APItest", "Description": "API test to change name, description, # of retries and archiveitems.", "MaxNumberOfRetries": 9, "AcceptAutomaticallyRetry": true, "ArchiveItems": false, "CreationTime": "2017-01-16T11:49:47.79Z", "Id": 32 } DELETE 42)Defines a piece of data that can be processed by a Robot and the information associated with its processing status. GET 2)/UiPathODataSvc.Reports()?$filter=QueueDefinitionId eq 2 and Status eq 'New' Response Status,ReviewStatus,Key,ExceptionType,Deadline,Priority,Robot,Postpone,StartProcessing,EndProcessing,SecondsInPreviousAttempts,RetryNumber,SpecificData New,None,7422e984-f9ea-42a1-a669-c262edaf12ff,,,Normal,,,,,0,0,"{""DynamicProperties"":{""Argument1"":""Test"",""UniqueNumber"":5}}" New,None,7d2c8f8c-26ed-442b-84ca-71a6c7954d24,,,Normal,,,,,0,0,"{""DynamicProperties"":{""Argument1"":""Test"",""UniqueNumber"":5}}" New,None,89888d1d-c1d9-4b1c-95b5-eebe17cfddcc,,,Normal,,,,,0,0,"{""DynamicProperties"":{""Argument1"":""Test""}}" New,None,8e2c2da2-88de-4160-8d5d-dddaa4afdc0e,,,Normal,,,,,0,0,"{""DynamicProperties"":{""Argument1"":""Test""}}" TEODOR\teodo,This is a Fatal log 1/22/2017 9:59:24 AM,Fatal,Open_and_Type_Notepad_TeoEnv,TEODOR\teodo,This is a Fatal log 1/22/2017 9:59:24 AM,Fatal,Open_and_Type_Notepad_TeoEnv,EVE\uipathadmin,This is a Fatal log 1/22/2017 9:59:24 AM,Fatal,Open_and_Type_Notepad_TeoEnv,SPARKY\uipathadmin,This is a Fatal log Returns a user permission collection containing data about the current user and all the permissions it has. POST) Request { "transactionData": { "Name": "myFirstQueue_APItest", "RobotIdentifier": "89fe329c-94c6-4449-83ba-4624e93d609f", "SpecificContent": { "totalValue": 666 }, "DeferDate": null, "DueDate": null } } Response { "@odata.context": " metadata#Queues/$entity", "QueueDefinitionId": 32, "QueueDefinitionName": null, "ProcessingExceptionId": null, "OutputData": null, "Status": "InProgress", "ReviewStatus": "None", "Key": "c685fc50-cc19-4ff1-b213-c9d9bf895399", "ExceptionType": null, "DueDate": null, "Priority": "High", "DeferDate": null, "StartProcessing": "2017-03-02T14:09:28.1673204Z", "EndProcessing": null, "SecondsInPreviousAttempts": 0, "AncestorId": null, "RetryNumber": 0, "SpecificData": "{\"DynamicProperties\":{\"totalValue\":666}}", "CreationTime": "2017-03-02T14:09:28.1516945Z", "Id": 784731, "SpecificContent": { "totalValue": 666 }, "Output": null }Adds a new item to a queue based on input parameters. { "LicenseKey": "", "MachineName": "", "Name": "", "Username": "", "Description": "", "Type": "DevTest", "Password": "", "RobotEnvironments": "", "Id": "" } GET eq 'Documentation 2' Response { "@odata.context": " metadata#Robots", "@odata.count": 1, "value": [{ "LicenseKey": "89fe329c-94c6-4449-83ba-4624e93d609f", "MachineName": "DESKTOP-E47LTUF", "Name": "Documentation 2", "Username": "win10vm2", "Description": null, "Type": "DevTest", "Password": null, "RobotEnvironments": "doc_env,yellow", "Id": 130 }] POST Request { "LicenseKey":"9cbacb47-a470-4226-83e3-39fddfd7ee0d", "MachineName":"DESKTOP-E47LTUF", "Username":"Documentation_API_test", "Type":"DevTest", "Password":"", "Name":"API_test" }Stores information about the last status reported to Orchestrator by a registered Robot. { "QueueDefinitionId": "", "ProcessingTime": "2017-02-21T11:49:11Z", "ReportType": "Minute", "NumberOfApplicationExceptions": 0, "NumberOfBusinessExceptions": 0, "NumberOfSuccessfulTransactions": 0, "NumberOfRetriedItems": 0, "ApplicationExceptionsProcessingTime": 0, "BusinessExceptionsProcessingTime": 0, "SuccessfulTransactionsProcessingTime": 0, "TotalNumberOfTransactions": 0, "TenantId": 0, "Id": "" } Stores information about exceptions thrown while processing failed queue items. Stores data sent when processing an item ended. Defines what type of value is stored by an asset. POST 1)/UiPath.Server.Configuration.OData.AddRobot Request Response Reverts the package versions for the given release to the last version it had before the current one. This is an OData version 4.0 standard compliant REST API that exposes entities and their relationships using well defined access, navigation and modification rules. More details here. Stores a custom pair of key and value for assets with type KeyValueList. A robot asset stores the information of a per robot asset for a specific robot, without specifying the robot. Supported methods: Get, Post, Put and Delete.{ "Enabled": false, "ReleaseId": "", "ReleaseKey": "", "ReleaseName": "", "PackageName": "", "EnvironmentName": "", "EnvironmentId": "", "StartProcessCron": "", "StartProcessCronDetails": "", "StartProcessCronSummary": "", "StartProcessNextOccurrence": "2017-02-21T11:49:11Z", "StartStrategy": 0, "StopProcessExpression": "", "StopStrategy": "SoftStop", "ExternalJobKey": "", "Id": "" }GET 'Dan') eq true Response { "@odata.context": " metadata#ProcessSchedules", "@odata.count": 5, "value": [{ "Enabled": false, "ReleaseId": 101, "ReleaseKey": "36dce01a-0bba-41c8-9b52-6528ba317f44", "ReleaseName": "DanBProcEmpty_danb_env1", "PackageName": "DanBProcEmpty", "EnvironmentName": "danb_env1", "EnvironmentId": "60", "StartProcessCron": "0/10 0/1 * 1/1 * ? Note: All examples have been built using the Orchestrator address. POST Request { "group": "UiPathadministrator", "rolesList": ["Administrator"] }Marks alerts as read and returns the remaining number of unread notifications. GET) Response { "@odata.context": " metadata#Users/$entity", "Name": "Docu'", "Surname": "Dr.", "UserName": "Documentation", "FullName": null, "EmailAddress": "", "IsEmailConfirmed": true, "LastLoginTime": "2017-03-04T19:45:59.737Z", "IsActive": true, "CreationTime": "2016-11-14T12:08:20.76Z", "AuthenticationSource": null, "Password": null, "RolesList": [], "LoginProviders": [], "TenancyName": "Default", "Type": "User", "Id": 77 } Returns the total number of notifications aggregated by alert name in the last specified days. GET daysNo=2) Response { "@odata.context": " metadata#System.Collections.Generic.Dictionary_2OfString_Int32", "Keys": ["Process.JobExecution.Faulted", "Process.JobExecution.Started", "Process.JobExecution.Succeeded", "Robot.StatusChanged.Available", "Robot.StatusChanged.NotResponding", "Robot.StatusChanged.Offline"], "Values": [1446, 2027, 10, 102, 97, 102] } Returns the total number of alerts, per tenant, that haven't been read by the current user. Stores data sent when processing of an existing or a new item starts. Defines the Robot availability state. { "UserId": "", "RoleId": 0, "Id": "" } Stores information about an application permission and role association, and returns the entire list of permissions. Defines the notification severity leve. { "Name": "", "IsGranted": false, "RoleId": 0, "Id": "" }GET "@odata.context": " metadata#Permissions", "@odata.count": 75, "value": [{ "Name": "Settings", "IsGranted": false, "RoleId": 0, "Id": 0 } , { "Name": "Robots", "IsGranted": false, "RoleId": 0, "Id": 0 } , { "Name": "Processes", "IsGranted": false, "RoleId": 0, "Id": 0 } , { "Name": "Packages", "IsGranted": false, "RoleId": 0, "Id": 0 }] }Stores information about assigned role(s) and email settings, and enables a person or a Robot to login to Orchestrator. { "QueueDefinitionId": "", "QueueDefinitionName": "", "ProcessingExceptionId": "", "SpecificContent": null, "Output": null, "OutputData": "", "Status": "New", "ReviewStatus": "None", "Key": "", "ExceptionType": "ApplicationException", "DueDate": "2017-02-21T11:49:11Z", "Priority": "High", "DeferDate": "2017-02-21T11:49:11Z", "StartProcessing": "2017-02-21T11:49:11Z", "EndProcessing": "2017-02-21T11:49:11Z", "SecondsInPreviousAttempts": 0, "AncestorId": "", "RetryNumber": 0, "SpecificData": "", "CreationTime": "2017-02-21T11:49:11Z", "Id": "" }GET eq 'doc_tests' and Status eq UiPath.Core.Model.Queues.ProcessingStatus%27Failed%27 Response { "@odata.context": " metadata#QueueItems", "@odata.count": 169, "value": [{ "QueueDefinitionId": 32, "QueueDefinitionName": "myFirstQueue_APItest", "ProcessingExceptionId": 389, "OutputData": null, "Status": "Failed", "ReviewStatus": "None", "Key": "1323fbce-3899-466f-bdec-1a2eaf90e66d", "ExceptionType": "BusinessException", "DueDate": null, "Priority": "Normal", "DeferDate": null, "StartProcessing": "2017-01-20T15:09:28.777Z", "EndProcessing": "2017-01-20T15:09:29.873Z", "SecondsInPreviousAttempts": 1, "AncestorId": null, "RetryNumber": 0, "SpecificData": "{\"DynamicProperties\":{\"totalValue\":423}}", "CreationTime": "2017-01-20T14:55:10.4Z", "Id": 782971, "SpecificContent": { "totalValue": 423 }, "Output": null }] } DELETE 782971) Response Stores aggregated report information about the processing status of all the items from a given queue in a specific time period. Response { "@odata.context": " metadata#Assets", "@odata.count": 1, "value": [{ "Name": "QueueName", "CanBeDeleted": true, "ValueScope": "PerRobot", "ValueType": "Text", "Value": "[Value per robot]", "StringValue": null, "BoolValue": false, "IntValue": 0, "CredentialUsername": null, "CredentialPassword": null, "Id": 3, "KeyValueList": [] }] } POST Request { "Name": "API_Test", "CanBeDeleted": false, "ValueScope": "Global", "ValueType": "Text", "Value": "API_test", "StringValue": "API_test", "BoolValue": false } PUT 79) Request { "Id":79, "Name":"API_Test", "Value":"API_test_part8", "ValueType":"Text", "ValueScope":"Global", "CanBeDeleted":true, "StringValue":"API_test_part99999", "RobotValues":[] } DELETE 80) Response Stores the value of an asset associated with a robot as well as the robot association data. The aggregation period used when computing a processing report. { "Key": "", "StartTime": "2017-02-15T15:39:43Z", "EndTime": "2017-02-15T15:39:43Z", "State": "Pending", "Source": "Manual", "BatchExecutionKey": "", "Info": "", "CreationTime": "2017-02-15T15:39:43Z", "Id": "" }GET ge 2017-02-13T10:49:25Z Response { "@odata.context": " metadata#Jobs", "@odata.count": 50, "value": [{ "Key": "5e6828d0-e3e1-42b9-92a2-8273a30f2b93", "StartTime": "2017-02-13T13:20:01.003Z", "EndTime": "2017-02-13T13:20:04.923Z", "State": "Successful", "Source": "Schedule", "BatchExecutionKey": "7ce6c1b0-9d9f-4d97-a6d5-eacf38361ca8", "Info": "Job completed", "CreationTime": "2017-02-13T13:20:00.143Z", "Id": 25832 } , { "Key": "0181fdef-7c81-4f2b-894b-1fb6ecda0fc0", "StartTime": "2017-02-13T13:20:03.88Z", "EndTime": "2017-02-13T13:20:01.503Z", "State": "Faulted", "Source": "Schedule", "BatchExecutionKey": "7ce6c1b0-9d9f-4d97-a6d5-eacf38361ca8", "Info": "Executor start process failed, reason System.Runtime.InteropServices.COMException (0x800700AA): The requested resource is in use. Defines the visibility level of an asset. Queue items are grouped in queues. Supported methods: Get, Post, Put, Delete. The UiPath Orchestrator API Guide is meant to help you easily access and manage all resources available in the Orchestrator web interface. POST 191)/UiPath.Server.Configuration.OData.ToggleRole Request { "role": "API_test", "toggle": true }Imports from AD all users from the given group and associates them with given roles. Defines the log severity. { "Reason": "", "Details": "", "Type": "ApplicationException", "AssociatedImageFilePath": "", "Id": "" } A role acts as a grouping of permissions. A collection of key value pairs containing custom data resulted after successful processing. { "Name": "", "Description": "", "Type": "Dev", "Id": "" }GET eq UiPath.Core.Enums.EnvironmentType%27Test%27Response{ "@odata.context": " metadata#Environments", "@odata.count": 7, "value": [{ "Name": "altest", "Description": "te", "Type": "Test", "Id": 4 }] }POST Request { "Name": "API_Documentation_Test", "Description": "API_TEST", "Type": "Dev" } DELETE 47) Defines the schedule of a process that can be executed at regular intervals, on selected Robots, all of them or a specified number of Robots. A valid robot licence key (X-ROBOT-LICENSE format) is required in the request headers. GET key=8) Response { "@odata.context": " metadata#Robots", "@odata.count": 68, "value": [{ "LicenseKey": "89fe329c-94c6-4449-83ba-4624e93d609f", "MachineName": "DESKTOP-E47LTU
